Where do we start with Positive Behaviour Support (PBS) in a Service?

This workshop will give practical information and examples of how PBS can be rolled out across a whole service. It will look at the structures and processes that need to be in place, how we used data, what policies support good practice and how to support staff teams. Ideas and experiences of implementing PBS in an effective and efficient way will be shared.

This workshop is aimed at directors, team leaders, managers, school principals, behaviour practitioners, other MDT clinicians and anyone involved in supporting children and adults with an intellectual disability with an interest in the systems approach.

What will be covered?

1. Key Components of Positive Behaviour Support Policy *(Caroline Dench)*
2. Systems Based Approach to PBS – Structures and Processes *(Christina Doody)*
3. Building a Positive Behaviour Support Culture *(Padraig Walsh)*
4. Practice Support - finding behaviour solutions with teams *(Gillian Martin)*
5. Reflective Practice *(Helen Crowley)*
